Stone Counter Tops

Our stone counter tops are fabricated for today's kitchens and bathrooms. With stone, you have unlimited design possibilities, a variety of edge treatments, and a wide selection of colors. Granite counter tops are provided with an extremely durable and easy to maintain surface. Unlike laminates and synthetic surfaces, stone counter top has the ability to withstand hot and cold temperatures. These characteristics make stone counter tops into the perfect choice for your bathroom, kitchen and backsplash applications. Bathroom counter tops are waterproof, stain-resistant and almost impossible to scratch, and will maintain a diamond-polished looks for years. Hot pans, spills and every-day activities pose no problem and cleaning is as simple as a damp cloth.
