White Galaxy Granite

White galaxy granite is provided with large-grained granite, which is medium to galaxy with a black matrix. And so it made granite attract beauty. This a classic choice, white galaxy granite makes an excellent building, tile or counter top granite; and it looks exceptional in a flamed finish. The principal characteristics of white granite also include high load bearing capacity, crushing strength, abrasive strength, amenability to cutting and shaping without secondary flaws, ability to yield thin and large slabs. Our white galaxy granite has polished surface and calibrated back.
